Software Engineer | **3+ years** of experience building scalable software systems using **Python, JavaScripts, and C++**, with strong foundations in DSA, distributed computing, data storage, and performance optimization.

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, System Design, Distributed Computing, Concurrency, OOP
Languages: Python, Java, C++, JavaScript, TypeScript, SQL
Backend: FastAPI, Node.js, Express.js, REST APIs, GraphQL, gRPC, Microservices, JWT
Frontend: ReactJS, Redux, HTML5, CSS3, UI Design
Data Storage & Infra: PostgreSQL, MySQL, MongoDB, Redis, Kafka, RabbitMQ, AWS, Docker, Kubernetes, CI/CD
Engineering: Code Review, Unit & API Testing, Debugging, Performance Optimization, Agile/Scrum

PROFESSIONAL EXPERIENCE

O2H Technology, Ahmedabad, India: Software Development Engineer Aug 2026 – Present

- Architected a full-stack registration and review platform (React, Redux, JavaScript), shipping 3 major production releases through iterative design and code review.
- Engineered a duplicate-detection and data-integrity validation system using structure-based parsing and identity-matching algorithms, eliminating redundant entries across a high-volume data pipeline.
- Implemented configurable, role-based access workflows enforcing strict permission boundaries, improving data governance and reducing invalid-state edge cases.

Sigma Infosolutions Ltd, Ahmedabad, India: Software Engineer Oct 2025 – Jul 2026

- Developed scalable services (Python, FastAPI, ReactJS, PostgreSQL, MySQL), reducing database query latency by **40%** through indexing and query optimization.
- Built production-grade REST APIs with JWT authentication and modular middleware architecture, improving service maintainability and test coverage.
- Provided technical leadership by reviewing **15+** production pull requests, giving feedback on style guidelines, accuracy, testability, and efficiency to uphold engineering best practices.

Avesta Technologies Pvt. Ltd, Ahmedabad, India: Software Engineer Feb 2023 – Jul 2025

- Shipped a rentals feature end-to-end (Python, FastAPI, ReactJS, MongoDB) for a production platform, driving a **20%** increase in daily active traffic.
- Optimized the media processing pipeline, cutting image size by **30%** and page-load time by **25%**, directly improving user-facing latency.
- Triaged and debugged production issues across backend services, analyzing root cause to drive resolution.

PROJECTS

Atlas – Distributed Search Engine [Link] 2026

• Built a distributed search engine in Python (FastAPI, Kafka, Redis) with a custom inverted index, BM25 ranking, and sharded coordinator; **2.7x throughput, 3.3x lower p95** on 4 shards, ~**10x** via caching, **0 errors** in a shard-kill drill.

TraceLens – Production-to-Code Intelligence [Link] 2026

• Built a production-to-code correlation engine (Python, TypeScript, ClickHouse, OpenTelemetry) that pinpoints failures to the exact commit. ~**49K spans/sec, 0 rejections**; guilty commit ranked **#1, zero false positives**.

Knowlify – AI Information Retrieval Assistant [Link] 2025

• Built an artificial intelligence-powered information retrieval and question-answering system (Python, FastAPI, LLM APIs, PostgreSQL, ReactJS) with REST APIs for document ingestion and query resolution.

EDUCATION

B.Tech (Bachelor's Degree) in Computer Science and Engineering 2019 – 2023
Charotar University of Science and Technology (CHARUSAT) GPA: 8.63 / 10

ACHIEVEMENTS

- Solved **700+** algorithmic problems on **LeetCode** across data structures and algorithms.
- Achieved a **2100** LeetCode Contest Rating and a **4-star** rating on **CodeChef**.
